

SMART Group SA invests in the future

SMART SA is offering South African University's Electronics Departments the opportunity to attend a unique learning experience by offering them free places on each of their upcoming Electronics seminars. Steve Eglinton, Chairman said, "A key aim of the SMART Group SA is to educate and improve the knowledge of our Electronics Engineers, this is a great way of reaching the people who will shape the future of the electronics industry within South Africa". The seminar program "Manufacturing Process Improvement and Optimisation" will run in Cape Town, Midrand and Durban, with world class speakers from Europe and the USA. It is attracting very good numbers of delegates with most of the major companies represented.
